- Mortars and Associated Equipment
- Operational and Production Schedule
- Electronic Firing System and Production Design

# *Understanding of the Events Concept*

In visualizing a firework display we talk not only with the client but also the local fire department. We do this to make sure we receive input regarding safety from fire officials which is very important. From there we plan for the shell size and type that will allow the maximum, yet safe, display. Selected shells will create a panorama of beautiful bursts of color and noise.

Mortars are set in racks as early in the day as possible. Loading takes place as early as needed to be ready to fire on time. After shells are loaded, crew members will maintain watch to keep observers at a safe distance.

If the display is choreographed, the Pyro will make the necessary contacts to coordinate the music and show start time. The program will be fired electrically.

Pyros will check with the client just minutes before the display is to start to discuss any safety concerns or changes in the weather that may affect the display. Again, safety is first. A show may be canceled or delayed rather than put anyone at risk.

After the completion of the show, the Pyro and crew will check all mortars. They will begin a cleanup of the area picking up trash left from the shells. Mortars, racks, wires, etc. will be picked up and placed in the truck. An additional site check will also be made the next morning.

## **About our Pyro Technician(s)**

Our highly trained, properly licensed technicians will be used for your show. Annual training seminars are held to upgrade the technician's technical knowledge. Our pyrotechnic personnel have been trained in product knowledge and safety skills.

## **Understanding the Role of Pyro Technician**

Lantis Fireworks & Lasers' perception of the role of the pyro technician at your event is to plan and execute the following duties:

- Supply all pyrotechnic components for the event.
- Supply all associated hardware and equipment for the performance.
- Supply a trained and licensed pyro technician for your location.
- Adhere to all state and federal laws and regulations.
- Perform all work in accordance with NFPA regulations covering the use of pyrotechnics.
