Subject: Garbage truck
Attachments: garbage truck quote 2024.pdf

Natasha attached is the quote for the garbage truck I would like to get ordered and on the next council meeting please. The cost that is quoted is the cost as if we bought it today, unfortunately neither dealer will not quote me a future price but they both agree that we will see a 3% increase after the first of the year putting the cost at \$380,348.00, so I would like to ask the council for the full \$385,000 that we budgeted for so we are not going back and asking for a small difference if the dealer is off some. If the price comes in at over the budgeted amount, we will have to look at other options, and I will know the exact price about 3 months before delivery which are expecting to be around June 2025. Let me know if you need more information for the council.

Best Regards,
Michael Campbell
